Cibinong, Bogor Regency, West Java 16915

Hello, let me introduce myself. My name is Prima Hari Nugraha, a fresh graduate in Informatics Engineering from Universitas Indraprasta PGRI. I have a strong interest and great curiosity in website application development, which motivates me to keep learning and continuously enhance my skills in this field. I have studied and mastered HTML, CSS, JavaScript, PHP, MySQL, Bootstrap, Laravel, React Js and other technologies for web application development. In addition, I am also proficient in Microsoft Office to support productivity and documentation, as well as having the ability to develop Java Desktop Applications using tools such as NetBeans and MySQL. I have practical experience in web development, having worked on several projects as a Junior Frontend Developer, Junior Backend Developer, and Junior Fullstack Developer. In the future, I aim to specialize as a Fullstack Web Developer and will continue focusing on strengthening my skills in both Frontend and Backend to become an Expert Fullstack Web Developer.

Education Level

Universitas Indraprasta PGRI - South Jakarta, Indonesia

Sep 2021 - Aug 2025

Bachelor of Informatics Engineering, 3.52/4.00

- Enrolled in the Class program batch 2021 of the Informatics Engineering study program. Learn about various programming languages during lectures such as HTML, CSS, JavaScript, MySQL, PHP, Python, Java, and also learn several frameworks such as Bootstrap, and Laravel.
- Relevant Courses: Web Based Programming, Databases, Database Systems, Advanced Web Programming, Visual Programming Fundamentals of Computing, Software Engineering.

Work Experiences

PT Amanah Karya Indonesia - Depok City, West Java, Indonesia

Feb 2024 - Jun 2024

Fullstack Web Developer Intern

PT Amanah Karya Indonesia is a company engaged in IT Consulting, Training, Education & Application Development, established in 2012 in Jakarta and has legal status as a Limited Liability Company (PT) since 2016. PT Amanah Karya Indonesia was built and developed with professional and experienced staff to provide the best solutions for each of clients. With more than 10 years of experience in the field of software development, they offer quality, timely and affordable software development.

- During the Independent Campus program, a certified Independent Study Internship (MSIB) at PT Amanah Karya Indonesia, my team and I created a website-based application using the Laravel framework, namely a money management system application called Smart Money, as our final project. This application is expected to assist and streamline the final project process for students in lectures and universities. I served as a front-end developer for this project.

PT Bank Tabungan negara - Depok City, West Java, Indonesia

Feb 2024 - Jun 2024

Junior Officer Intern

Bank PT. Bank Tabungan Negara (Persero) Tbk, is a state-owned bank in Indonesia specializing in housing finance, particularly mortgages (KPR). Founded in 1897, BTN also provides personal, business, and sharia banking services with an extensive network of branches and ATMS nationwide.

- During my internship as a Junior Officer at PT. Bank Tabungan Negara (Persero) Tbk, I assisted employees in administrative and operational tasks, with a primary focus on accounting data entry.
- Supported accounting staff in data entry, verification, and documentation in compliance with company standards. Ensured accuracy and efficiency in handling daily operational data. Collaborated with team to improve workflow and administrative processes. Gained practical experience in banking operations, data management, and basic accounting. This internship enhanced my skills in attention to detail, accountability, and teamwork within a professional banking environment.

Projects

P-Social

- P-social is a mini-project I developed during my MSIB program at PT Amanah Karya Indonesia. It's a Twitter/X-inspired social media web application built using Laravel 10. Its main features include user authentication, posting, and a timeline feed. Designed with a responsive interface for multi-device accessibility, the application served as a valuable learning experience in strengthening both technical and collaborative skills.

Smart Money

- Smart Money is the final project I developed during the MSIB program at PT Amanah Karya Indonesia. This application focuses on personal financial management and includes an e-learning feature to provide user education. In this project, I worked as a Frontend Developer, responsible for designing and implementing an interactive and responsive user interface. The application was built using Laravel 10, enabling seamless integration of financial management and learning features in a single platform.

VegeSale

- Vegesale is a project developed during the Internship Program (KKP) at Universitas Indraprasta PGRI. It is a website for selling vegetables and various kitchen essentials, integrated with the Midtrans payment gateway to support secure online transactions. In this project, I worked as a Frontend Developer, responsible for building the user interface with React.js, while the backend was developed using Express.js for data management and system integration.

Best Employee DSS

- My final project is titled "Decision Support System for Selecting the Best Employee at PT Brantas Abipraya (Persero) Using the SAW Method." This application was developed using Java NetBeans and MySQL to assist the company in evaluating and determining the best employee based on several criteria, including attendance, performance, discipline, and loyalty. By applying the Simple Additive Weighting (SAW) method, the system provides a desktop-based solution that supports objective and measurable decision-making.

Pnews

- PNews is a news portal website project developed using Laravel 12, integrated with Filament as the admin panel. The application is designed to streamline news content management, including article publishing, category management, and user administration. With a responsive and user-friendly interface, PNews supports the delivery of fast, accurate, and easily accessible information to readers.
